

Automate to elevate:

7 ways packaging automation can benefit your business

1. Boost bottom line

Compliments your workforce by handling repetitive and manual tasks more efficiently - helping your business to achieve more

2. Improve lead times

Speeds up your process, allowing you to fulfil orders more quickly with minimal interruptions between production runs

3. Increase safety

Reduces time spent on potentially hazardous tasks by up to 72%, lowering injury risks (ISHN), creating a safer and more efficient workplace

4. Meet requirements

Simplifies meeting retailer demands by minimising human error and delivering uniformed and reliable packaging that boosts shelf appeal

5. Adapt quickly

Accommodates various pack sizes and orientations, allowing you to make adjustments quickly without sacrificing output or quality

6. 24/7 production

Enhances efficiency by allowing for a 24/7 operation, enabling you to maintain peak productivity levels at all times

7. Reduce waste & materials

Uses less cardboard and optimised design helps to reduce waste by up to 20% (Suvit), reducing costs and supporting sustainability goals
